

# How TestComplete Helps an IT Company Develop Commercial Software for the Building Sector

## RESULTS

**3X****300%**

Reduced testing time from 24 hours to 8 hours, increasing efficiency by 300%

**2000 Tests**

Capable of running 2,000 tests in 2-3 hours using distributed execution.

**We recreate the problem in TestComplete, and work to make sure the problem is fixed and won't repeat.**

**TestComplete simplified the process.**

## Overview

A leading renewable energy company faced delays due to extensive manual testing of their energy trading and risk management system. They required an automation tool to expedite the testing process without compromising quality.

## Approach

- Transitioned from manual UI testing to automated testing with TestComplete
- Integrated TestComplete with their Java development environment, improving script management and execution
- Scaled up their software testing to accommodate rapid growth and agile methodology adoption

## Benefits

The adoption of TestComplete and TestExecute allowed the company to maintain a high frequency of updates with three releases per week and provided the agility needed for their growing software development team.
